DETAILED ACTION

Receipt is acknowledged of amendment filed on May 9, 2006. Claims 10-18 are pending. Although examiner had indicated allowability of subject matter during the previous telephone communication on May 2, 2006 with applicants' representative, the following rejection is necessitated upon updated search result.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 10-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US 7067547 B1).

Smith teaches an aqueous contact lens solutions comprising an effective amount of preserving agent and buffer, wherein the preserving agent is polyhexamethylene biguanimide and alexidine salts, and the buffer is Bis Tris Propane buffer. See col. 1, lines 23 – 33; Claim 2. The reference also indicates that surfactants (poloxamines and poloxamer), chelating agents (edentate disodium dihydrate), tonicity agent (sodium chloride), and a cellulosic viscosity modifying agent are commonly added in marketed products. See Example.

While there is no specific formulation comprising applicants' microbicide and Bis Tris propane buffer, it is viewed that one of ordinary skill in the art at the time of the present invention would have obviously made the combination according to the teachings of the Smith reference in expectation of successfully making an aqueous contact lens solution.

Response to Arguments

Art Unit: 1617

Applicant's arguments with respect to claims 10-18 have been considered but are moot in view of the new ground(s) of rejection.
